

Christopher BONDIER

Computer Engineering Student, Full Stack Developer Apprentice

Lyon, France / christopher.bondier@gmail.com / christopher-bondier.com / +33 6 15 92 58 32

Computer Engineering student at CPE Lyon (IRC), currently working as a Full Stack Developer Apprentice at Ubikap, building production SaaS features spanning frontend, backend, real-time communication and system architecture. Looking for a 9 to 12 week international internship in an English or French speaking environment for Summer 2027.

PROFESSIONAL EXPERIENCE	Full Stack Developer Apprentice Since Aug. 2024	
	Ubikap, Villeurbanne, France (LegalTech SaaS for law firms, accounting firms and legal departments)	
	Electronic signature module redesign: rebuilt a core part of the existing signature system, with multi-step signature workflows run in successive waves; built an event-driven pipeline handling DocuSign webhooks and processed signature proof documents; used pessimistic locking to handle concurrent requests and keep data consistent; wrote extensive tests to validate the new system. Video conferencing system (Agora RTC): improved the video call feature to support conferences with many participants, building a dynamic video gallery with dynamic stream subscriptions, dual-stream video and host/audience roles; worked on performance and scalability for real-time video streaming. SaaS maintenance and refactoring: fixed bugs and maintained existing code; progressively refactored legacy code toward a cleaner architecture using Clean Code principles and Domain-oriented design (Use Cases); added automated and regression tests to keep features stable during refactors.	
	Full Stack Developer Intern From Apr. 2023 to July 2023	
	Ubikap, Villeurbanne, France	
	- Maintenance and development of an Angular and Node.js web application. - Developed a feature allowing users to monitor and visualize their paid usage using Chart.js.	
EDUCATION	Engineering Degree, Computer Science & Communication Networks (IRC) From Sept. 2025 to Aug. 2028	
	CPE Lyon, Villeurbanne, France	
	Apprenticeship engineering programme combining academic studies with professional experience at Ubikap. Focus: software engineering, backend, cloud/DevOps, networks, databases.	
	Bachelor of Technology in Computer Science From Sept. 2022 to July 2025	
	Université Claude Bernard Lyon 1, Villeurbanne, France	
	Three year university degree covering software development, databases, web technologies, systems and project management.	
SELECTED PROJECTS	React / NextJS / Express, Academic ERP Project: Development of an ERP platform in a team of 20 students to support administrative tasks within the university IT department.	
	JS / PHP, Eduquizz: Development of an online learning platform allowing users to create and study interactive flashcards.	
TECHNICAL SKILLS	Languages	TypeScript, JavaScript, Python, Java, C, PHP, SQL
	Frontend	Angular, React, HTML, CSS
	Backend	Node.js, REST APIs, event-driven architecture (webhooks, use cases), transactions & concurrency
	Databases	PostgreSQL, MongoDB, data modeling
	Cloud & DevOps	AWS fundamentals, Docker, Linux, Git
	Real-time / Integrations	Agora RTC (WebRTC), DocuSign API
	Certifications	AWS Academy Graduate, Cloud Foundations
LANGUAGES	French	Native
	English	C1
	> TOEIC : 950/990
